

1. Facebook
2. Yes
3. On mobile the UI is responsive and more structured because it really feels like you are seeing your mobile phone.
4. On the desktop the UI is just following where you adjust it. It is not structured the way I'm seeing the mobile but it is still responsive.
5. I like the design of Facebook because it is user-friendly. Anyone will not have the difficulty to navigate features on Facebook except for those who are not tech-savvy.
- 6.
